

Folding door fitting for 1 folding door with 2 panels  
**WingLine 780**

## Broad and strong

Attractive styling, fast assembly and load-bearing function – the WingLine 780 combines all these qualities in a very effective design.

A simple cabinet construction is sufficient, with no necessity to reinforce the top panel even with wider-type doors.

Unsurpassed also is the way in which its load-bearing function is teamed up with the benefits of rapid assembly: once assembled, the fitting is simply clipped into the runner profile where it is secured in place by two guide rollers.

- Suitable for use throughout the home
- With runner profile on top panel
- Runner with load-bearing function
- Optionally with bottom guide
- For wooden doors or wood framed doors
- Toolless quick-connect door assembly
- Cabinet design also suitable for hinged doors

### Technical brief:

- Door weight max. 10 kg/door panel
- Door panel height: max. 2200 mm
- Door panel width 400 - 500 mm
- Side-mounting with Interimat 9943 fast-assembly concealed hinge. Sensys hinge 8645i can be used on doors of up to 22 mm thickness.
